Dear Mr. Barr:

First Nickel Inc. looks forward to the launching of IDNR-TV as an important bridge between the public and natural resource companies in Canada. Presentation on the true impacts of mining, exploration and forestry on the natural environment will provide a new perspective that will allow the public to make informed decisions regarding our natural resources and provide companies with a positive venue to discuss their recent activities.

First Nickel will make available the information on where to watch and subscribe to IDNR-TV, to our interested shareholders, upon the announcement of IDNR-TV's broadcast affiliation. I personally look forward to this launch and will watch IDNR-TV at every opportunity.

Sincerely,
Paul Davis
Vice President of Exploration
